KOREA MEDICAL DEVICE

KOREA Medical Device Companies
Directory Book 2020

Korea Medical Device Industry

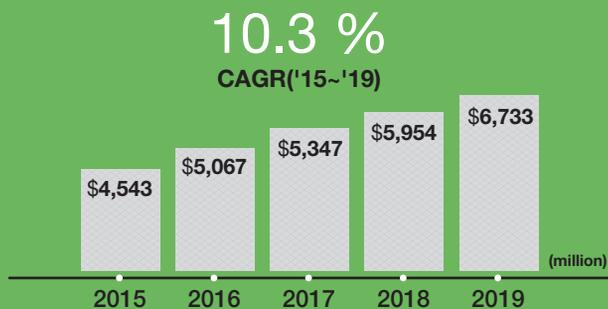

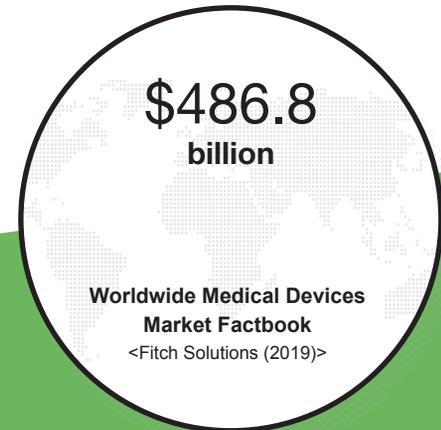

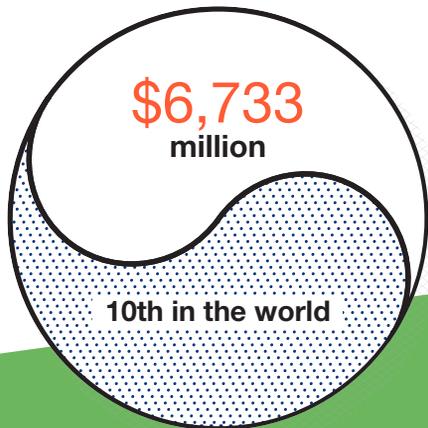

With an economic growth rate of 2.8% compared to 2018, it achieved the 12th largest GDP in the world, and recorded remarkable growth in **the medical device industry** centered on advanced technology.

Korea Medical Device Industry

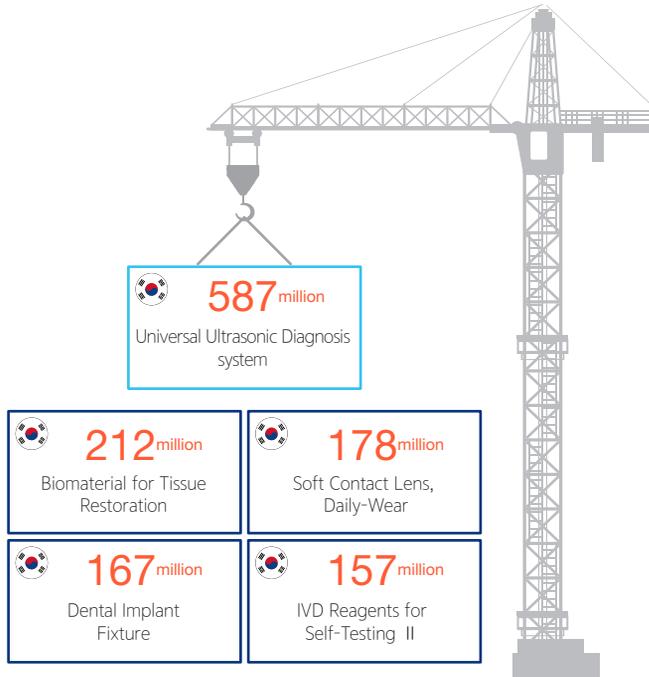

The medical device market in 2019 was 6,733 million, up 14.5% from 2018, and has maintained an average annual growth rate of about 10.4% since 2015. It ranks 10th in the global medical device market.

Fitch Solutions (2019) predicted that the global medical device market will grow 5.8% annually since 2020 to \$486.8 billion in 2022, and Korea is growing at an annual average rate of 6.5%. Compared to 2018, medical devices have become a new economic growth engine for Korea, with 10.3% growth in 2019.

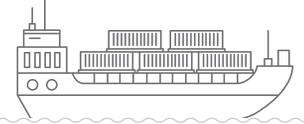

Korea Medical Device Export items and countries

The current status of the global medical device market is 23.8% of the total market for Diagnostic Imaging, 16.2% for Consumables and 12.7% for Patient Aids, while the rest of the market is for Orthopedics/ Prosthetics, Dental Products and other medical devices.

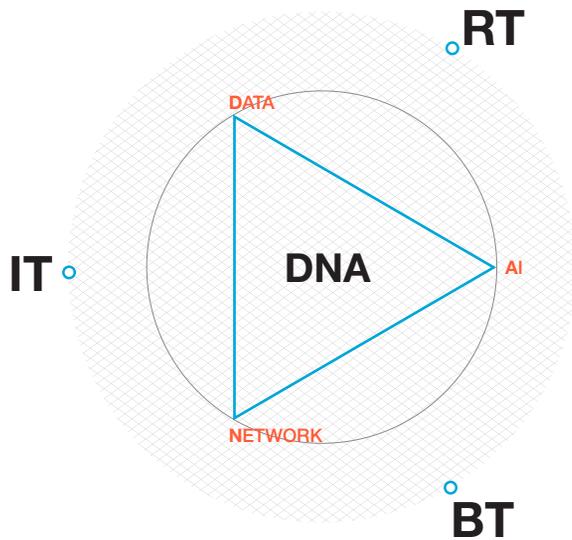

Under the current status of global markets, Korea has five major export items: Ultrasound imaging system, general-purpose (16.3%), Biomaterial for tissue restoration (5.9%), Soft contact lens, daily-wear (5.0%), Dental Implant Fixture (4.6%), and IVD Reagents for self testing (4.4%).

product	Export country and amount					
	1	2	3	4	5	etc.
Universal Ultrasonic Diagnosis system	 142.4	 61.9	 49.3	 42.1	 32.0	etc.
	24.2%	10.5%	8%	7%	5%	44.2%
Biomaterial for Tissue Restoration	 123.0	 31.1	 16.4	 2.8	 2.4	etc.
	57.9%	14.6%	7.7%	1.3%	1.1%	17.2%
Soft Contact Lens, Daily-Wear	 46.4	 27.3	 16.5	 16.5	 11.8	etc.
	25.9%	15.2%	9.2%	9.2%	6.6%	33.6%
Dental Implant Fixture	 43.4	 16.6	 10.8	 6.1	 5.7	etc.
	25.9%	9.9%	6.4%	3.6%	3.4%	50.5%
IVD Reagents for Self-Testing II	 30.9	 15.5	 9.1	 5.6	 5.5	etc.
	19.5%	9.8%	5.7%	3.5%	3.4%	5.7%

Korea Medical Industry strengths

Korea Medical Device has great strengths in accurate diagnosis, shortening treatment and patient safety by consistently presenting clinical analysis results of patient data and high-tech convergence products.

Korea has been investing heavily in three areas by using DNA (data, network, and AI) strategies that utilize the strengths of information and communication technology (ICT), robot technology (RT), and biotechnology (BT).

SaMD(Software as a Medical Device) Based on AI Big Data

Personalized rehabilitation medical device

ACEMEDICAL

+ MEDICAL DEVICE PRODUCTS

AutoMed 3200 Pain control

The user can easily change the volume and lock time of the delivery drug

- Medical staff and patient can easily control the injection amount.
- N2Check the amount of drug delivery by monitoring the LCD.

AutoMer II Maintenance of fluid temperature

Preheating of blood, blood products, and body fluids to prevent hypothermia patients

- Designed for patients who need a large amount of blood because of bleeding during surgery.
- Heat plates are heated from 37°C to 41°C, and the blood and body fluid heating system creates ideal injection temperatures.

AceScope Video Laryngoscope

With AceScope, intubation procedure will be much easier and convenient

- AceScope has the highest screen and picture quality so that air-way can be clearly observed and secured.
- Touch screen makes operation of AceScope much easier simpler.
- Various sizes of AceBlade make AceScope suitable for all cases of intubation.

ALPINION
MEDICAL SYSTEMS

+ MEDICAL DEVICE PRODUCTS

E-CUBE platinum Ultrasonic diagnosis

Ultrasonic diagnostic system designed with a new user interface to assist medical staff with medical procedures

- New hardware and design enhance 2D images to obtain high-resolution images.
- Applies the improved image processing technology, Optimal Imaging Suite™ Plus.
- Dual pulse controls for the 2D mode and Doppler signals, respectively.

ALPIUS 900 Treatment for uterine myoma

Non-invasive tumor removal by concentrating high-intensity ultrasound into the body

- The Water Circulation Module controls the medium's temperature in the treatment head and the dissolved oxygen.
- The entire treatment process can be monitored with high-definition real-time ultrasound images, and 3D images of pre-targeting tools and treatment areas are provided.

+ MEDICAL DEVICE PRODUCTS

Lucas plus Tattoo removal, Pigmentation treatment

The Nd: YAG laser system with laser medium in various bands

- These high-power color response laser machines effectively remove skin color using 532nm and 1064nm lasers.
- 1064nm of wavelength permeates the entire skin, treating deep lesions such as tattoos and scar without scarring.
- 532nm of low wavelength is used to treat pigmentation such as freckles, blemishes, and aging spots.

Olive plus Depilation

Uses 810nm Diode to destroy black melanin pigments in hair follicles

- Laser beams provide the same amount of energy to all pulses to reduce pain and protect the surrounding skin tissue.
- Unlike other dolorific devices, this device has an electric cooling system, so it safely delivers the most precise energy to the skin layer until the hair follicles are destroyed without anesthetic cream.

BOTOSONIC HIFU Skin Lifting and Tightening

An Advanced Anti-Aging System Based on HIFU Technology

- The SMAS (Superficial Strongic Aponeurotic System) remodels skin tightening by providing the deep dermis with collagen.
- Directly affects the target tissue and does not affect the user's daily life.

Choyang Medical Industry

ENDOCAB PLUS Endoscopic image

Enhanced control and traceability for drying and storage of flexible endoscopes

- Data management system with barcode scanner
- Channel air distributor with HEPA filtered air
- Internal air circulation with temperature controller in cabine

CYW-DUO Medical equipment sterilization

Cleaning sterilizer for flexible endoscopes in a touchscreen operating system

- Adopts a reliable leakage test.
- Rotational injection--impeller type (using a water pressure method).
- Thorough cleaning and disinfection of the interior by applying a type of flow sensor.
- Includes a sterilizing solution heating system, an advanced country type filtering system, temperature control, and self-disinfection.
- Features a 7-inch LCD touchscreen and independent OS (software).

+ MEDICAL DEVICE PRODUCTS

V-POD Foot Blood Circulation

Skin adhesive Light Therapy Based on Low-Level Light Therapy Technology

- Effective and safe light therapy device for women and men's foot fatigue, health, and beauty purposes.
- With its own PAMS technology, light energy relaxes smooth muscle tissue and restores blood flow rates.

Woman Stress Free Menstrual pain treatment

Skin Adhesive Light Therapy with PAMS technology relaxes the smooth muscles of uterine tissue

- A medical device unique in its field is effective and safe for women experiencing PMS (Pre-menstrual Syndrome) and severe menstrual pain.
- It is medically verified for clinical evaluation of patients with menstrual pain.

LIFEGAIN CU-HD1 Defibrillator / Monitor

Hospital grade defibrillator monitor with ECG, SpO2, NIBP, Pacer, and ETCO2 options.

- Rugged design to withstand hard conditions with convenient shortcut buttons for use in emergency situations.
- Data transmission using Bluetooth.

iPAD CU-SP1 Automatic External Defibrillator

Light weight and easy to use AED for the general public to use in case of cardiac emergency.

- Easy to use with CPR guide and CPR detection. This allows anyone to be able to save a life of a cardiac arrest patient.
- Ambient noise detection [automatic voice prompt volume adjusting].

HPA-130W Plasma air disinfectant

Advanced air disinfectant with plasma technology that eliminates 99% of bacteria.

- Easy installation design. Voice support functions for each operation mode.
- Human detection sensor for added safety and automatic filter replacement warning.

Shield Apron Radiation protection equipment

Radiation protection used for surgery or procedures using X-rays

- Tungsten-based core material "made by CWORLD"
- Our lead-free x-ray radiation protection aprons that have tungsten compound inner material shielding sheets have the same protection level as conventional shielding sheets of lead materials, while they are much lighter and softer.
- Prevents stickiness due to sweating through the internal mesh.
- Waterproof outer fabric is effective in preventing secondary infections in hospitals.
- High-quality sewing quality.

HIPRO-V Skin beauty, fat reduction

HIFU, Non- invasive skin lifting and tightening treatment a fat reduction / No need Additional Cartridge Type; Controlled the depth only by GUI

- This high strength concentrated ultrasound system delivers HIFU energy to the SMAS layer, located between the body's muscles and subcutaneous tissue and the dermis or fat layer.

PENTAGON GRAND Skin beauty

Mitigates and treats scars, improving pores and reducing wrinkles

- With CO2 fractional and surgical laser systems, the beam is divided into finely sized units to minimize damage to normal tissues.
- Reduces skin downtime by enabling quick treatment.

AROMA GRAND Depilation

Hair follicle destruction by selective thermolysis.

- When energy penetrates the dermis by emitting red and near-infrared wavelength energy and is optionally absorbed by melanin, only the hair follicles are selectively destroyed by the heat rise.

+ MEDICAL DEVICE PRODUCTS

PURISMA

Skin beauty

Creates and transmits plasma energy to improve facial wrinkles

- Energy transfer to all layers of skin by a specially designed JET handpiece.
- The transmitted plasma energy induces collagen production in the epidermis layer.
- The process makes a short treatment time possible and removes various wounds without scarring.

Therrawave

Body care

A non-invasive device that effectively reduces fat in the body's target areas

- Interactive Selective RF technology optionally delivers RF energy to another fatty layer using different impedance from its application to normal tissue.
- Induces the apoptosis process of apoptosis cells to minimize inflammation and remove fat cells.

DAIWAHA

+ MEDICAL DEVICE PRODUCTS

INFUSION PUMP Injection medicine

Premium Infusion Pump with Central Monitoring System

- newly launched infusion pump models (DI-6000/6000V/6200V) with TFT Color LCD & jog dial.
- Central Monitoring System (wireless): Checking operation and alarm of multiple pumps in real time with a monitor from nurse station.
- PCA and TCI are available.

ELECTROSURGICAL UNIT Tissue coagulation, incision

Multipurpose Premium Energy Platform

- Use of electric energy with monopolar and bipolar at the same time in a generator.
- Auto Power Control & Auto Power Stop function
- DAIWAHA's electric energy device 'MEDIPOALR' is available

ULTRASONIC ENERGY DEVICE SYSTEM Tissue coagulation

Cost-effective and convenient with all in one

- MEDISONIC for cutting and sealing blood vessels and tissue during minimally invasive surgery.
- lightweight(338g) materials to minimize fatigue of user's wrist by being lighter than other products.
- Built in transducer.
- Ultrasonic & electric energy device, bipolar and laparoscopic instruments are available in a generator.

Ceiling Pendant System Hospital Facilities

Ceiling Fixed Facility System Customized for Hospital Systems

- Varied functions include carbon dioxide emission, a nitrogen control panel attachment, and many patented technologies.
- Can be manufactured to custom specifications.

OVC

Oxygen Supply

Continuous oxygenation during gastroscopy and monitoring of patient breathing

- The absorption function prevents saliva from passing to the bronchus.
- Various procedures can be performed automatically and simultaneously.

Built-in Filter Mask

- Filter in the mask body structure
- For the safety of the patient by blocking germs
- Preventing, blocking, blocking and blocking
- Prevent indoor air pollution
- Automatic protection with filter functions

Filter Mask and Filter Infectious prevention

Mask and respiratory filters with a radial duct structure and excellent fluid diffusion to maximize cleaning function

- A product with a built-in bacterial/viral filter inside the mask prevents cross-infection and secondary infection.
- Easy to transport and handle, saving resources and providing energy efficiency.

bexcore

Breast biopsy

Examine or remove breast tumors without surgical scars

- Continuous sampling through vacuum construction with 4 step adjustments of the inner blade (5mm, 10mm, 15mm, 20mm) enable use as an intuitive interface.

bexcore fast

Breast biopsy

A disposable core biopsy instrument used to collect tissue samples for biopsy

- “Automatic” and “Semi-automatic” functions enable accurate biopsy (incorporates a strong automatic plasticization mode and an exact semi-automatic plasticization mode).

ReMUSiL

Breast marker

Helps to insert a marker into the breast and find the lesion easily after the biopsy 6 different marker tips allow for marking multiple sites & lesions.

- Made from human body compatible materials.
- Easily removable and does not damage the biopsy device during the re-biopsy.

Anyfusion H-100

Infusion

New concept infusion pump in which there is no need to distinguish between Infusion and a Syringe Pump

- Use as an infusion pump by rotating the direct motion of the syringe.
- The cylindrical pump incorporates the infusion pump's advantages while the syringe pump makes it easier to inject.

EZ-Regular

Infusion set

Infusion set operated with one-hand

- One-handed operation is possible by utilizing a single infusion tube.
- The dosage can be controlled by a safe and appropriate controller.

NT-381.C

Automated External Defibrillator

Analyzes the heart rhythm and provides electrical shock for cardiac defibrillation

- This small portable device analyzes the heart rhythm and provides defibrillation shocks to reset normal heart rhythms.
- Provides an audio/visual prompt to explain each step of the defibrillation process.

Knee1004

High frequency Stimulator

Pain relief function for lesions using Endogenous Dermal Heat

- High-frequency delivery to the knee via flexible electrodes developed with ergonomic design.
- It converts high frequency into bio-thermal energy to relieve pain in the deep tissue.

Bone-Pro

X-ray bone mineral densitometer

Bone density measurement using the CONE BEAM method with excellent reproducibility and accuracy

- The X-ray takes less than three seconds for a quick examination.
- Low energy radiation allows accurate bone density measurement.

CAPRI

Skin beauty

Treatment of various skin diseases with a Blue Laser

- Uses dual wavelengths of 1450nm + 400nm with a Blue Laser. This means a noticeably short downtime after treatment.
- Used for bloodless procedures, atopy improvement, mask skin troubles, burn treatment, pore reduction, etc.
- Less pain and shorter procedure times mean that the effects can quickly be checked.

ATO

Skin beauty

Laser treatment device with a bacterial therapeutic effect

- Used for atopic dermatitis, infant atopic dermatitis, housewife eczema, and impetigo
- It is excellent for reducing the volume of sebaceous glands, improving elasticity, and reducing pores due to its heat transfer effects.

FLEXLUX

Skin beauty

Light cure for skin beauty and treating the effects of cancer and cranial nerve damage

- The first usage of four-wave and low-output phototherapy to treat these conditions in the nation

HR-503

Cardiac defibrillation

Quickly and accurately analyzes the patient's ECG to remove defibrillation in the atrium or ventricle

- Electric shocks are sent directly to the heart through electrodes placed on the chest wall.
- All-in-one pads that do not require separate pad connections can be used quickly and are suitable for adults and children without replacing the pads.
- Support available for four language functions (Korean, English, Chinese, Japanese)
- Fast charging when using an AED.
- Safe and efficient cardiac shock with low impact energy.
- Extract/analyze data through access to a separate internal memory.

MS-980S

Pain relief

Promote metabolism, reduce visceral fat, and relieve pain

- Heats the inside evenly and provides a thermal effect from the heart of the human body.
- Cuts costs by reducing warm-up time.
- Effectively removes the smell of sweat through antibacterial functions.
- The new material heating element is exceptionally durable, safe, and chemical resistant.

HERA I10

Gynecological
Ultrasound Diagnosis

Provides ultrasound images using high synthesis aperture technology

- Applies a next-generation beamformer “CrystalBeam™,” the image processing engine “CrystalLive™” and “Crystal Architecture™,” consisting of “S-Vue™” in a single-crystal probe technology.
- An innovative product offered in a chair type design that completely deviates from the general ultrasonic treatment concept by providing it in a comfortable environment.

HERA W10

Gynecological
Ultrasound Diagnosis

Ultrasonic diagnostic devices with 11 times signal throughput and 10 times more data transfer speeds

- Helps with early diagnosis of high-risk mothers, as well as ultrasound tests for mothers, to determine if there are fetal abnormalities.
- It contains an added “MV-Flow™” function that realistically expresses fine blood flow, quantifies blood flow, and offers a “Lumi-Flow™” function that shows blood flow three-dimensionally.

Laport

Laparoscopic surgery

A device that allows the use of various laparoscopic surgery instruments while maintaining the aeroperitonium

- Built-in a rotatable converter measuring 5mm.
- One-touch button for easy removal of smoke and gauze.
- The serration structure is easy to use and prevents displacement when using the instrument.
- The ergonomic design provides an excellent grip.

Laparoscopic Single Port

Laparoscopic surgery

General ports for laparoscopic surgery, including a robotic surgery device

- Comes with a single detachable port for single-incision laparoscopic surgery (SILS).
- International ports enable the use of various instruments from 5mm to 12mm.
- Includes a spring valve for smooth gas circulation.
- Optimized for robotic surgery with high flexibility and heat tolerance.

COMFORT COUGH II

Suction airway body fluid

It helps patients to cough by rapidly shifting from putting the air in the lung to taking out the air.

- It is much more efficient and gives no pains comparing to other alternatives, such as using a suction and tapping on the back.
- COMFORT COUGH II is only one device in the world which has 3 modes in 1 device. [Basic MI-E], [Oscillation], [Percussion]

CF10

oxygen therapy

It delivers the warm and humidified air through the nasal cannula. By giving the continuous flow of fresh gas at high flow rates replacing or washing out the patient's pharyngeal dead-space.

- It prevents from airway inflammation, which can increase airway resistance and impair mucociliary function possibly leading to decrease secretion clearance.
- Humidity : >33mg/L at 37°C target
- Maximum temperature of delivered gas : 43°C (109°F)
- Maximum flow range : 10~60 L/min (Adult mode) : 2~25 L/min (Junior mode)
- Oxygen : 21~95%

Pain relief

Digital Combination Electrical therapy (I.C.T+ Silver Spike Point (SSP))

- High accuracy with frequency creation digitally.
- Reduced resistances to human body by soft output.
- Featured with saving parameters for easy use.
- Simultaneous operations of suction and rate.
- For the patient's safety (Zero Start, over-current protective circuit) Featured with Intensity Auto-OFF at stop (Interference wave only active).

STS-1000

Pain relief

Vibrator for medical use

- Controls the intensity of vibration easily using an output controller.
- Easy and practical operation; designed to provide vibratory stimulation to the body to relieve of pain.
- Provides various of applicators (accessories) which are selectable depending on treatment areas and uses.
- A modern design that allows for height adjustment for convenience and can keep of accessories.

Veincare

Varicose vein surgery

Treats all evidence of varicose veins through the release of lasers into the vein to clog blood circulation

- When lasers are irradiated into varicose veins through optical fibers, the veins decrease, and blood regurgitation is prevented.
- 1940nm wavelengths are employed to provide fast and effective intravenous laser treatment.
- Minimizes the risk of intravenous perforation and ensures high echo visibility.

Piocare

Tattoo removal, Skin care

Picosecond laser system with a complex medium of 1064nm & 532nm + 595nm and 660nm

- The system's performance, especially its speed and convenience, is superior to other devices in the market.
- PICO CARE decomposes all color tattoos and pigments into small particles with shorter pulse duration and higher peak power.
- Improves skin safety because of its low heat on the skin.

Endoscopic System QVION19 Endoscopic image

Provides high-quality endoscopic resolution with a clear and accurate Full HD image system

- Available to all hospital departments with video modules containing light source devices with a resolution of Full HD 1920x1080 and a frame rate of 50/60fps.
- Includes a full LCD touch control system for convenient operation.

XCN3 extreme Respirator treatment

Direct drug delivery for the treatment of bronchitis, asthma, and rhinitis

- Uses the most recommended treatment for respiratory patients.
- The drug is designed to be delivered directly to the treatment area, so its effect is certain and quickly evident.
- Two nebulizer kits can be operated simultaneously for efficient treatment.

CHAM NEW CU-500 ENT Workstation

A desk that can be used as an ENT comprehensive unit, enabling efficient diagnosis and treatment.

- The built-in endoscopic storage drawer is equipped with UV sterilizer functions. It controls each function with a comprehensive control switch.
- Patients are treated with a warm instrument fixed at about 40°C to reduce patient resistance.

EVS 4343W

Indirected detector

The highest portability and performance offered for perfect low-radio imaging

- Provides stable image quality despite low doses.
- Detects microbial lesions with a detector that can express clear images even in thick areas.

RMS UD

Mammography detector

The image-optimized 65 μm pixel size enables excellent image detection

- With 18 years of proven a-Se technology and high DQE/MTF, the device boasts the best SPAC and detects micro lesions in the breast with fine pixels.
- It has a high frame rate of 4.4 fps, so it is possible to apply tomography to high-speed photography.

FLAATZ 600

Direct Detector

A portable detector with increased lightness and durability

- A light, all in one metal unibody structure and high-quality durability.
- It can image smoothly (720 pictures per 3h) with rapid charging and incorporates temperature safety through a direct method finished with a special coating technology.

X-ray Grids

Anti-scatter grid

It removes scattered x-ray created while x-ray passes through the object and if the scattered x-ray is not removed properly, it'd reduce the image quality significantly.

- Grid 1000(Aluminum – Interspaced) - Most popular and cost effective solution
- Grid 2100(Carbon Graphite – Interspaced) - Specialty solution for mammography, digital breast tomosynthesis & FPD based C-arm
- Grid 3000(Fiber – Interspaced) - Solution with lower attenuation

Digital Upgrade Solution

X-ray Diagnostics

It is an ideal solution for a clinic looking to upgrade its analog x-ray system to digital. JPI offers a full range of attractively priced digital detectors, from high quality CsI flat panels to new technology IGZO Panel.

- Integration of various flat panel detector by different manufactures
- Modality Work List Generator provided as bundle
- Multiple language support
- Fast and professional image processing for each individual examination

DynaVue

Veterinary Digital Fluoroscopy System

Super sensitive IGZO based FPD allows to gain high quality images with low dose, which also lowers the dose exposure to the surgeon and the patient.

- Digital Radiography & Real-time Fluoroscopy
- Larger FOV(17x17") compared to C-arm (max.12inch)
- Image distortion free compared to C-arm (Image Intensifier)
- Real-time image processing (30fps under 2x2binning@pulse)

Lunit INSIGHT CXR2 Chest image analysis AI

Software that assists a physician in reading results by detecting suspected abnormalities such as solitary pulmonary nodule/tumefaction, hardening, pneumothorax, and other issues in chest x-ray images

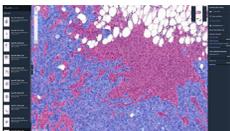

- Reduces the rate of missing the diagnosis of major lung diseases such as lung cancer, tuberculosis, pneumonia, and pneumothorax.
- Early diagnosis of major lung diseases through chest x-ray imaging.
- The accuracy of diagnosing major lung diseases by non-radiologists is improved to the level of radiologists.

Lunit INSIGHT MMG Mammography analysis AI

Software that assists in a doctor's diagnosis by detecting abnormalities suspected to indicate breast cancer in mammography images

- Both mammography specialists and general radiologists can improve breast cancer diagnosis and reduce the recall rate.
- Accuracy of reading mammography reports that indicate breast cancer by non-radiologists is improved to the level of mammography specialists.

Lunit scope Tissue image analysis AI

Accurately detect cancer's substrate, epithelial tissue, lymphocytes, etc. in H&E slide images

- Objective quantification of tumor penetration lymphocytes for pathologists or researcher.
- New biomarkers can be found in the classification according to the immune phenotype.
- Provides information on tumor penetration lymphocyte density within the tumor and generates the ratio of substrate-epithelial tissue within it

Dr.MED x BOA FIT System

Support and assist

The products help the rehabilitation of the functional loss of body parts through a scientific design that considers anthropocentric characteristics

- Provides support and stability to the injured area (cervical vertebrae, upper limb, hands, waist, knees, ankles) in the form of ergonomic guards and assures a warm and comfortable fit through the use of neoprene fabric.
- Delivers fine control and intense pressure with a small amount of force.

Gingival
Retraction Cords

These materials are used in the retraction of gingival tissue around a tooth

- The unique knit design contains the hemostatic fluid inside to prevent bleeding.
- The knit rings are open, providing external force, and smoothly opening the gap between the teeth and the gingiva.
- The length of each product is 254cm and has 101, 102, 103, 104, 105, 106 thicknesses.

Kaolin Hemostatic Dressing Gauze

Haemostatic dressing

Promotes the blood coagulation process through the ingredients of kaolin

- Kaolin is a natural inorganic mineral that does not contain harmful substances and provides a quick hemostatic effect.
- It is a clinically safe substance without the risk of fever/ allergies/ counter-reaction/ hypersensitivity reactions.

DualPor® Collagen Series

Collagen Bone Substitute Series

Bone Formation Biomaterial

Collagen-scaffold coated double pore structure collagen that acts as an extracellular matrix (ECM)

- Collagen accounts for about 22 percent of bone tissue, framing bone precursor cells, and helping them to act as ECMs.
- Allows vessel growth and bone cell movement by a macropore structure.
- Existing macros are advantageous for vessel growth, movement, and adhesion due to micro double pores' structural characteristics.
- Additional improvement in cell adhesion and proliferation due to the collagen component on the surface.

Rafugen DBM Gel Pro

Bone graft materials

Implant at the part where the bone defect has occurred

- High viscosity makes it highly plasticized.
- Induces fast synostosis with DBM Powder.
- Excellent biocompatibility by using CMC and Starch as an excipient.

Bio BMP2

Bone graft materials

Induces osteogenesis in the part where the bone defect has occurred

- Gel-type bone grafting material contains animal cell-derived osteoplastic recombinant protein in DBM (Demineralized Bone Matrix).

BENCOX

Hip arthroplasty

Corentec provides a wide variety of femoral and acetabular components that consider the unique needs of diverse patient

- The user can select from 4th generation ceramic delta heads and liners with excellent strength and bio-compatibility, highly cross-linked polyethylene heads, and liners with high abrasion resistance.

EXULT

Artificial Joint

Providing optimal shape and movement for knee joints

- Corentec's improved abrasion resistance and proven biomechanical performance enable excessive extension protection and high bending exercises.
- It enhances the movement of the patella and prevents hip dislocation.

Optirad Volar plate

Distal radius implant

Fixing system for distal radius fracture on the wrist

- The implant reduces tendon damage with an optimized design that is a watershed in design, featuring easy metal plate bending lines that can fit any anatomical shape.
- A variety of products are available to cover many surgical approaches: Anterior Cervical Interbody Fusion (ACIF), Posterior Lumbar Interbody Fusion (PLIF), Transforaminal lumbar interbody fusion (TLIF), Transforaminal Posterior Lumbar Interbody Fusion (T-PLIF), and minimally invasive oblique lateral interbody fusion (OLIF).
- It features an open space design that is optimized for a comfortable and complete union of bone graft.

Submerged Qualified(SG)

Dental implant

Implant for improving implant placement safety and rapid recovery

- Effective, rapid bone fusion is induced through Sandblasted, a large grit, and acid-etched(SLA) surface treatment.
- The design includes double and open screws and tapers for initial implant placement safety.

Luvis M/L200

Dental modeling

3D printing system applicable to various fields such as Model, Clear Aligner Model, Surgical Guide, and Wax-up

- A patient-customized model can be produced.
- High-quality F-seta lenses, galvanometers, and lasers with premium details.
- The Stereo Lithography Apparatus (SLA) 3D Printing System uses high-sensitivity lasers for modeling, regardless of complexity. It can even print fine expressions.

ZENITH U

Surgical lighting

Astral lamp for a large hospital and operating room

- If an obstacle is detected, a smart sensor can automatically adjust the illumination's intensity value to minimize shadow without blind spots.
- The constant lighting system minimizes light intensity changes in the treatment area.

Genoss DES Angioplasty

Treats lesions in small vessels with a coronary artery stent

- The immunosuppressive drug "sirolimus" which suppresses the propagation of vascular cells is coted on the product.

Genoss Inflator B40 Angioplasty

Shrinks and inflates balloon catheters for vascular treatment

- Balloon expansion with an analog pressure gauge that shows pressure up to 40atm.
- Control the pressure with a plastic handle for pressurization and decompression and a button with a locking and loosening function.

Genoss 3D cage Spine prosthesis

Treats structural abnormalities caused by lumbar disc herniation

- Used in orthopedics and neurosurgery.
- Made with SLM (Selective Laser Melting) 3D printing technology using titanium powder.
- Various lengths and angles provide customized procedures for each patient's anatomical structure.

MONALISA Skin care

Lidocaine Filler

Temporary wrinkle improvement

- Designed to allow the user to inject highly biocompatible hyaluronic acid with less force through the push rod and handle.
- This reduces any adverse effects of the cross-linking agent on the human body.

HKT Locking Plate System Orthopedic implant

Plate for fracture bone fixation

- High-quality instruments for the convenience of surgeons.
- Differentiated instruments with an anatomical design different from the general instruments.

HKT Cable Grip Plate system Orthopedic implant

The selectable plate depends on the operation range and conditions for fracture bone fixation

- Provides pre-outline anatomical design plates.
- A cable and locking screws (optional) can be used together.
- It consists of a stand-alone type and a connecting type and can be chosen depending on operation range and conditions.
- Cable fixing screws easily pull the cables and improve stability.

BH200 Orthopedics handpiece

Use in osteotomy for trauma and joint replacement

- Speed can be adjusted gradually and easily changed between Forward and Reverse for easy drilling.

EZX ACETABULAR CUP REMOVAL SYSTEM Orthopedics handpiece

Use to remove the Acetabular cup during hip revision surgery

- Removes the acetabular cup safely and accurately.
- Efficiently reduces bone and tissue loss and prevents additional non-bone fractures.

SPINAUT-E Drug delivery

Delivers analgesics to the exact position within the spine

- The epidural catheter is designed to reduce issues that occur when delivering painkillers to the lower spine.
- A single working channel exists for drug delivery and the microscope.

MEDIANUT-V Drug delivery

Delivers bone cement to the spine through a percutaneous approach

- A non-circular device for placement of bone cement in surgical sites.
- A convenient tool for injecting bone cement into the spine.

Optimus CMF System Orthopedic implant

Improved plate to solve the clinical problems faced in mandible surgery

- Reduced cutting area due to the low basic profile of the plate/screw.
- An innovative screw design enables low insertion torque.
- The round plate edges reduce soft tissue irritation.

BIODEGRADABLE CMF PLATING SYSTEM Orthopedic implant

A plate with high biocompatibility, absorbency, and osteoconductivity

- Provides sufficient physical intensity for the reconstruction of the skull (maxilla).
- Maintains its intensity for at least 16 weeks and carries out in-vivo biodegradation for 12 months.
- A second surgery to remove implants is not required.

TRAUMA & EXTREMITIES Orthopedic implant

A simple and comprehensive anatomical plate that provides flexibility and convenient use

- The implant's color-coding (plate and screw) can be easily identified.
- The pre-outlined plates save adjustment time during surgery.
- The plate's round edges reduce soft tissue irritation.

EPI-Detection

Negative pressure measurement

A medical device that detects the epidural space by monitoring the negative pressure of epidural space

- Negative pressure is detected at a preset pressure-critical value and transmits the information to the LED.
- As saline and air injection is not used, it can prevent complications such as Pneumocephalus or air embolism, epidural hematoma, post-dural.

Cure-fix

Fixing drainage tube

Temporarily fixes the medical device on the skin

- Silicon friction prevents drainage tube displacement.
- Simple connection structure.
- Gently attached along the curvature of the skin with a hydro-colloid band.
- Hydro-colloid material reduces pain when attached and detached.

Spine MT k-1

Spine treatment

'non-surgical & non-invasive spine treatment machine with decompression' for patients suffering especially 'Herniated Disk' (HNP, DDD), including Stenosis, Scoliosis, Facet Syndrome, Myofascial Pain Syndrome, Sciatica.

- It is designed not only to cure the disease through the feedback function between the device and the patient, but also designed to strengthen the musculature and ligament surrounding the affected area with the unique & dynamic chiropractic functions integrated in it.
- It is so proud that this is the only device in the world that can provide the 'customized' treatment to correct any twisted and misaligned spine in 3(three) dimensions

Noble Rex-E

Metabolism activation

'multi-functional healing bed' that helps you for obesity management, intestinal mobility, pelvic correction, lower body bathing and postpartum care. It is also a multi-system, of which motor skills stimulate your pelvis, waist and abdomen.

- Color therapy provides the emotional stability, using the different frequencies and unique wavelengths of each color.
- Far infrared radiation heating therapy by minerals, including ceramic and jade inside the capsule relaxes the stiff muscle mass. The radiation also promotes the blood circulation & metabolism and relieves the pain.
- Aerobic exercise effect. The strong vibration takes good care of the obesity and enhances the functions of organs.
- Salt hot pack. The compress-processed hard rock-salt provides the optimal effect of lower body bathing, moxibustion and sauna, recovering your fatigue.

IONBLUE SHAKE-OFF

Air cleaning and light treatment

Anion-stimulating metabolism and LED lighting to suppress drowsiness

- As plasma ion clusters spread from the five outlets, the air is purified, and DC fan anion clusters are accelerated.
- Blue LED lighting technology stimulates nerve cells in the retina to control melatonin production.

IONBLUE SWEETDREAM

Air cleaning and light treatment

Promotes the production of melatonin hormones to alleviate insomnia and boost immunity

- Filters and absorbs fine particulate matter with a bamboo activated carbon filter, which eliminates the cation (positive ions) associated with tobacco smoke, sulfur dioxide, nitrogen oxides, and carbon monoxide through the chemical decomposition of various organic molecules.
- Induces sleep through special wavelength LEDs that promote the production of hormones that induce sleep.

WALKBOT_S

Robot-assisted
gait training
rehabilitation system

This rehabilitation medical device is composed of a robot-assisted gait training system for locomotion-impaired patients.

- Applies to the rehabilitation of various diseases, such as stroke, spinal cord injury (SCI), brain tumor, multiple sclerosis, cerebral paralysis, and other diseases related to the neurorehabilitation.
- Successfully implemented superlative functions for the first time in the world. [Synchronization of three actuated joints (Ankle/Knee/Hip), Finer automatic leg length adjustment system, Natural Gait Pattern Generating S/W (NGPG), Interactive training mode]

WALKBOT_K

Robot-assisted
gait training
rehabilitation system

Dedicated for pediatric patients with Playground system design as per Children's eye level and children-specific gait pattern

- Provides exciting customized 3D virtual reality exercise games so patients actually do not perceive the gait training as a form of therapy, rather enjoy walking in interactive and ecologically natural or virtual environments

WALKBOT_G

Robot-assisted
gait training
rehabilitation system

Compatible with both adults and children through add-on robotic orthosis

- Provides gait analysis, measurement, evaluation programs, and summary report. This allows the therapist to effectively assess the patient's recovery stage and establish an optimized training plan for each patient.

SEVEN-LINER ZAM ZAM

Improvement
blood of circulation

It is limb compression circulator that have been proven effectiveness through the clinical trial at a university hospital for lymphedema patients, and are beauty device that are effective for beautiful legs and waist.

- Those help to relieve tension of the muscles before and after exercises and sports
- sports aid equipments In order to help increase blood circulation, periodically high air pressure pumping to inflate the limbs and sleeves prevents swelling and daily fatigue.

COCLEAN

Nasal disease treatment

The world's first nasal disease treatment assistive device that sprays saline solution in the depths of the nose in particle form, cleaning, treating the nose, and inhaling the runny nose of infants

- Sprays saline solution in the form of ultra-fine particles (0.68 microns) into the nose without irritation.
- Foreign substances can be removed from the eyeball using eye caps.
- The inhale function helps prevent disease by removing foreign substances from the nose.

FCW3000

Rehabilitation Training

Produced in a form fixed to a large ceiling, it is effective in group therapy and play therapy for Active Standing & Functional Rehabilitation

- Turn painful and difficult treatment into a pleasant experience, and promote rapid and functional recovery through standing and walking therapy.
- It is possible to fit the dual-rail at the desired angle to be installed in a preferred way.

PGT9000

Rehabilitation Training

Active Standing & Functional Rehabilitation Treatment Devices with Dual Safety Stand Types that can be relocated without damage to the ceiling

- There are plenty of places to grab for waking up from the wheelchair, so it is easy to get up.
- Reduces the risk of falling as the patient may hold the handle or pole while wearing a harness.

G-suit

Patient support and fixation

Enhance utilization by designing for pain relief

- Suits that can be used regardless of body type enhance patient training through their explicit design for pain resolution.

CMDD-04M Cancer diagnosis

Multi-Channel Automated Diagnostic Device uses urine as a specimen to detect 8 types of cancer (Breast, Colorectal, Stomach, Lung, Liver, Pancreatic, Prostate, and Bladder cancer).

- Sensor kit to be inserted to diagnose up to 4 people simultaneously within 20 minutes.
- Size: 466mm(W) x 439mm(D) x 389mm(H).
- Intended to be used at home, coffee shops, etc.

CMDD-04 Cancer diagnosis

Multi-Channel Automated Diagnostic Device uses urine as a specimen to detect 8 types of cancer (Breast, Colorectal, Stomach, Lung, Liver, Pancreatic, Prostate, and Bladder cancer).

- Sensor kit to be inserted to diagnose up to 4 people simultaneously within 20 minutes
- Size: 690mm(W) x 600mm(D) x 1600mm(H)
- Diagnosis is conducted through semi-automated system.
- Intended to be used at private hospitals, pharmacies, etc.

CMDD-12 Cancer diagnosis

Multi-Channel Automated Diagnostic Device uses urine as a specimen to detect 8 types of cancer (Breast, Colorectal, Stomach, Lung, Liver, Pancreatic, Prostate, and Bladder cancer).

- Automatically diagnose up to 12 people simultaneously within 20 minutes
- Size: 2,400mm(W) x 900mm(D) x 1,850mm(H)
- Simple operation, diagnosis can be conducted by both medical and non-medical personnel through fully-automated system
- Intended to be used at hospitals, clinics, examination centers, etc.
- There is also CMDD-20 which diagnose up to 20 people simultaneously (Upsized model of CMDD-12)

HS-2000

Autoclave

Uses high-pressure saturated vapor as a sterilizing medium

- The standard device includes five types of sterilization cycles, two test cycle programs, and self-diagnosis and alarm programs.
- Users can change the basic program settings depending on sterilizer or packaging to smoothly cope with sterilization.

HG-2000

EO gas sterilization

Uses a mixture of "Ethylene oxide (EO)" and "Freon" or "Carbon dioxide (CO₂)" as a sterilizing medium

- Optional communication programs for multi-users with universal capability can be built in.
- The operational information for each sterilizer connected to the network system is safely stored and stored in the DB Server. Users can conveniently check any information needed anytime and anywhere through the Client Computer in real-time.

HP-4512

Low Temperature Plasma Sterilization

Designed to indicate how plasma is produced

- It was developed to improve the effect of sterilization by allowing heated air to penetrate deeply into the device or the lumen of medical devices, thereby preheating and drying them.

HD-5610C

Dry heat sterilization and culture

Reducing the financial burden of purchasing a culture medium separately

- The chamber is heated simultaneously on the interior four-sided wall and is forced to circulate air using a fan, maintaining a uniform temperature distribution.

PANAMutyper R Lung cancer liquid biopsies

Prediction of Lung Cancer Patients with EGFR Mutations

- Patients with EGFR mutations have very high drug reactions to EGFR-TKI (Tyrosine Kinase Inhibitor), including Gefitinib (Iressa, Astra-Zenca) and Erlotinib (Rochetar).
- The biopsies are expected to lead to effective lung cancer treatment by allowing drug reaction prediction.

PNAclamp Column biopsy

Prediction of metastatic colorectal cancer patients with NRAS mutations

- NRAS mutations are found in several cancers, such as melanoma (13-25%), colon rectal cancer (1-6%), lung cancer (1%), thyroid cancer (7%), and Hepatocellular carcinoma (10%).
- Reduces drug reactions to colon rectal cancer treatments such as Erbitux and Cetuximab.

PANA Column biopsy

RealTyper Kit

Diagnose using DNA extracted from the patient's urine

- The Kit can accurately detect the presence of 13 STI (Sexually Transmitted Infections) and distinguishes each infection type with the Multiplex Real-Time PCR using the unique Tm of each PNA fluorescence probe.

Gmate Immunoassay

Accurate and fast COVID-19 Ag detection POCT (Point Of Care Testing)

- COVID-19 Ag is detected directly from a Nasopharyngeal Swab and Sputum sample.
- Provides result in 15 minutes and indicates Sensitivity 94.4%, Specificity 100.0% and Accuracy 97.2%.

Gmate smart Blood glucose measurement

Simply connect to a smartphone to measure blood glucose

- No battery is required because it uses power from connected mobile devices.
- Incorporates smaller modules by storing more data in a smartphone's free space.

RheoSCAN

Blood diagnosis

Measures the comprehensive hemorheological properties of red blood cells

- Enables early detection of diabetic complications such as diabetic kidney disease, diabetic retinopathy, and metabolic syndrome.
- Inspection time within an average of 1-2 min.

ANYSIS

Blood diagnosis

Tests platelet dysfunction for inherited, acquired, or drug-induced patients

- platelet function test (ADP, Epinephrine).
- Antiplatelet test (Aspirin, P2Y12).
- Hemostasis and Fibrinolysis test (Anysis-ETG).

RheoESR

Blood diagnosis

Measures erythrocyte sedimentation rate (ESR), ESR results in 20 seconds by measuring the kinetics of red blood cell aggregation.

- With innovative and patented technology, it can provide the various benefits including.
 - Results in seconds.
 - No reagents required.
 - Easy to use.
 - Fully automated.
 - Precision and reliable reproducibility.

SD CHECK GOLD

Blood glucose measurement

Minimizes incorrect measurements, including information such as the valid period of the test paper

- Fast and accurate results in 5 seconds
- Memory: Saves 400 measurements
- Measurement method: Glucose Oxidase biosensor
- Measurement result range: 10 - 600 mg/dL (0.6 - 33.3 mmol/L)

STANDARD F HIV Ag/Ab FIA

Immune diagnosis

A 4th generation HIV diagnostic product that simultaneously tests HIV antigen (p24) and HIV-1/2 antibodies in serum, plasma, and whole blood

- Simultaneously detects HIV antigen (p24) and HIV-1/2 antibodies in serum, plasma, and whole blood using fluorescence immunization chromatography
- Easily test for HIV early detection and screening results within 15 minutes with high sensitivity and specificity

SEEPREP32™ Molecular diagnostics

An easy to use small automatic nucleic acid extraction system

- A bead-delivered nucleic acid extractor capable of rapidly processing up to 32 samples, enhancing productivity and efficiency in the examination room.
- Up to 32 samples can be processed simultaneously within 30 minutes using the bead delivery method from a magnetic rod.
- Uses a tablet PC to support remote driving.

Seegene Launcher Integrated software

Easy, convenient device-driven software from nucleic acid extraction to PCR setup

- Automatically control protocols for various molecular diagnostics (MDx) examinations
- Includes a tutorial for all processes, including sample preparation, nucleic acid extraction, and PCR setup
- Integrated data processing through LIS linkage with a barcode system (HL7 file support)
