are available.

Feature of LEMONA Mask

LEMONA 3D Mask for Blocking Yellow Dust and Ultrafine particles using Quadruple Structured Non-Woven Fabric

It allows to breathe comfortably at Large Space inside Mask through it perfectly covers from Nose to Jaw due to 3D Stereoscopic Design.

Feature of LEMONA Mask

It helps prevent sliding down and condensation
By using nose piece, and it blocks external air
By increasing adhesion with high elasticity ear loop.

LEMONA Mask, which is different from regular
Disposable mask, makes face angle look better
Through V-Line Structure.

The reason why LEMONA Mask should be selected

Mask with **V-Line** that makes face angle look better.

It blocks Ultrafine particles up to 90% through **Quadruple Structured high performance filter**.

Comfortable breathing by securing extensive internal space

Excellent adhesion with **Stable nose piece**

What is Health Mask?

Unlike mask for the protection against the cold, as this mask has a capability to block particles and it used in everyday life for protecting the respiratory system from particulate harmful substances or source of infection.

What is KF?

As abbreviation of Korea Filter, it is the performance standard certified by KFDA.

The number means the filter efficiency(%) that filter out fine dust.

It is divided into KF80, KF94, KF99 etc., as the number increases, the filter efficiency of fine dust is higher.

It is slighty difference from class certified by Occupational Safety and Health Agency, strict standard in comparision with standard class of NIOSH.

Packaging

- **Sanitary Packaging and Individual Packaging Mask**
 - ⇒ Each Mask is individually packed, so it's hygienic and easy to carry.
- **Practical Packaging Box**
 - ⇒ Easily take out and use individually packaged mask.

KF80 | Individual pack per a mask

KF94 | Individual pack per a mask

KF-AD | Individual pack per 3 pcs of mask
