About us

Our company started manufacturing in 2017(Dongwon Medical) and established global business sales part in 2019(Whiterose global). We are an OEM,ODM-specialized production plant and has its own global brand-named Bio-series and WHITEROSE. The thread and the methods of installing have obtained many patents of which several certificates are international. We have been certified by GMP, ISO13485, KFDA, CE, and various certificates of trademark registration.

International Certificates

Whiterose is a brand born with the beauty of roses and the image of rose thorns, and the slogan “Today is a beautiful day” means that the day White Rose and customers meet is the beginning of a beautiful day.

Our main products and know-hows include invasive threads and methods for face and body lifting, contouring and rejuvenation. The plastic thread and the methods of installing have obtained many patents of which several certificates are international.

Product

How dose the treatment work?

The area of treatment is locally anaesthetized and then the absorbable thread is inserted into the tissue. The type and the number of threads that are to be applied will be discussed with you beforehand.

By the minimally invasive procedure new connective tissue is build up around the thread so that the skin gets firmer and tighter. Certain types of threads can also tissue to its original position.

This new and gentle method leaves neither wounds nor scars.

The threads are absorbed after a certain time depending on the type of the thread.

The results will be visible for a longer period. Your doctor can give you more detailed information on this.
