

# Full Spectrum Light System is new-way for 21C medical treatment!

Now I fix the illness with light

## “ Visible Light Therapy Apparatus won a Nobel Prize ”

KG-CL004

N. Finsen who is Dutch medical doctor cured tuberculosis cutis by irradiation using the sunlight for the first time in 1899 and he was awarded a Nobel Prize (1st Nobel Prize in Physiology or Medicine, 1903) due to this treatment.

And today, many hospitals and laboratories in the world are researching light effect and treatment. According to the recent studies, full spectrum light, ultraviolet light, colored light, and laser cure chronic pains, depression, immunological disorders, intractable diseases, and cancers, and it helps clinical treatment significantly. Also, various light therapy apparatuses for medical use are being developed no

## Principle of arc light

The Visible light therapy equipment principle provides arc discharge by installing electrodes in special medical high purity carbon. This causes plasma to occur in the electrodes.

The combustion temperature of carbon emits combustion luminescence at an ultra high temperature of about 3000 degrees. This is the only natural light that faithfully reproduces the principles of the sun (plasma phenomenon) and is a phototherapy device using very advanced technology that produces an artificial sun of 1cm in diameter, automatically controls the computer, and controls the wavelength of light.

This advanced technology has been researched and developed by Kumgang Advance Co.ltd

(The surface temperature of the sun is about 6000 degrees) At this point, it creates an artificial sun with a diameter of 1 centimeter that burns at an ultra-high temperature of 3,000 degrees.

Arc rays emit more than 100,000 types of wavelengths simultaneously, without distinction, such as in units of 0.01 nm, in units of 0.1 nm, from 290 to 5000 nm. This is called [Full-spectrum light system].

The same continuous spectrum as solar energy is the light that cannot be made without carbon arc method, which burns materials at ultra-high temperatures on the same principle as the sun.

As these 100,000 kinds of light make each feature stand out and cover each other's shortcomings, light collaboration takes place.

In addition, the wavelength range of this collection of lights is a combination of seven medical carbon that can be freely controlled by computer control and by disease-specific symptoms. Because continuous spectral light emits all light, the wavelengths of light currently used in medical and beauty care emit all.

(UVB, UVC, which is harmful to the human body, does not emit any dangerous high-power light that causes burns such as lasers and IPLs.)

## What is the Full Spectrum Light System?

Arc light is an unprecedented Visible light therapy equipment that can simultaneously perform the chemical and physical actions of light. "If carbonized light is examined, carbon and various elements mixed during carbon rods burn together and light energy along with light," which penetrates deep into the body,

improves blood circulation, increases immunity, increases metabolism, produces and activates vitamin D in the body, increases calcium in the blood, activates the secretion of hormones, and promotes cell proliferation, which increases immunity. Carbon light also strengthens cells with cell regeneration and increased heat-activated protein (HSP).

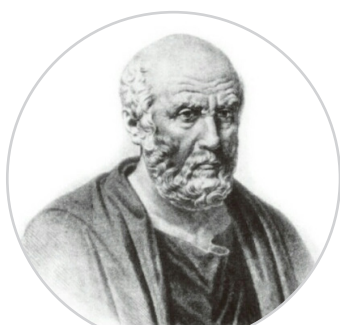

Light penetrates into our body and it can raise the temperature of deep part, which

enhances level of immunity and germs, viruses or cells are killed by high temperature.

## Miraculous Full Spectrum Visible Light Treatment is...

Effect of carbon light which is full spectrum visible light raises the temperature of human body killing cancer cells effectively but protecting normal cells. The reason why cancer is cured by light therapy is that it has light recovery action, blood circulation promotion action and increasing action of immunity level through the production of Heat Shock Protein (HSP). In oriental medicine, it can be explained that these are the elimination of diseases by vital force promotion using the fire of life and strengthening of muscle. Infrared, short and long wave or magnetic therapy have excellent pain killing effect also, but their efficacy is much less than the pain killing effect of carbon light, and it is the real pain killing made through the enhancement of natural healing power of human body. It is not the temporary effect made by simple paralysis of pain sense or anesthetic effect but it cures the diseases completely by natural healing as well as eliminating the cause of pain.

Hippocrates

Humanity worshiped the sun as a god in ancient times and they used sunlight as a treatment method of diseases. In medical history, Hippocrates (born in 500) who is regarded as the father of medicine started to use a light for the treatment. Since then, light treatment has been spread over the world with scientific and medical evidences. Hippocrates said "If disease cannot be cured by medicine, it should be cured by operation, and if it cannot be cured by operation, it should be treated by the heat."

It is to treat the affected part using the spectrum that is generated when carbon rod containing high purity elements is burned at high temperature.

## Light has absolute power for living creatures.

In 5 million years of human history, there were malnutrition due to the lack of food, but there were no lack of light. Change of life environment by the cultural development causes lots of diseases by the lack of light.

**What does your body really need? We need to think about it once again.**

It is necessary to deeply recognize the importance of light rays according to medical and scientific grounds, and to treat the natural healing power of humans by irradiating safe light rays using visible light that is most similar to sunlight.

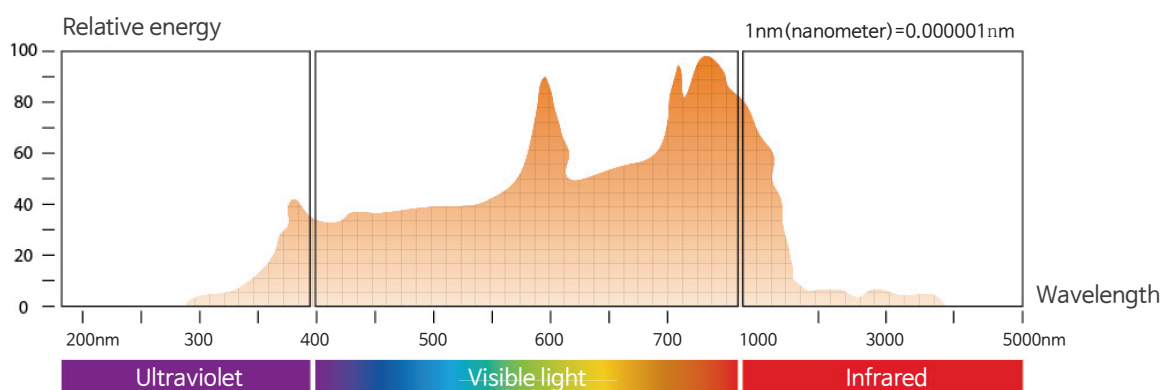

As for medical care, there are various mental effects, but what cannot be corrected by drugs or surgical measures, it can be seen that the amplification of the natural healing effect of living things according to the wavelength of light shows a remarkable recovery. Just as visible light is needed to nurture life, it can be said that living things contain light components. They are based on the laws of nature.

In order for the vegetation to bear fruit, flowers bloom first. It takes a lot of energy (heat) to blossom and bear fruit. In other words, to absorb a lot of heat from space, you need to absorb limited visible light into your body.

## Full-spectrum light system wave field

The wavelength of light, 290 nm to 5,000 nm, is the visible light area, which we perceive as light electromagnetic waves. **Rainbow, purple, navy, blue, green, yellow, orange and red** shown through the prism are known to feel the brightest in the visible light area at 555 nm.

The units of brightness are known as "Candela" color temperature units, but because they deal with wavelengths here, the smaller units are shown as "Km" units in "Angstrom". There are infrared and ultraviolet rays in the wavelengths outside the visible light.

Visible general light (continuous light) irradiated in carbon arc, etc.

## Why does the disease continue to increase even if medicine or science develops?

It's proven to be harmless, free of side effects, and non-addicted.

The mysterious curative effects of carbon have been clearly verified in the human body's disease. The carbon bar component changes the spectrum. This study has been done, the color ratio for the disease has been shown, and the carbon bar is designed to produce many kinds of spectral distributions with fine components.

## Visible light therapy can be effective in any disease

## “ Why light? ”

Light has absolute power over life. Life cannot live without light.

Humans also maintain life by breathing air and ingesting nutrients under sunlight.

You are getting the energy you need to survive. Rays and colors are the oldest healing tools in human history. One, and comprehensive visible light therapy is made by burning natural sunlight or carbon.

It is a therapy that induces physiological changes in the human body using carbonized light, an artificial visible light. Originally, light therapy was initiated by humans using sunlight.

There is a record of treating leukoflaxia using solar radiation and a plant called Amaranthus in ancient Egypt. Dr. Charaka, known as the originator of Ayurveda, a traditional medicine in India, There is already a literature that says that early sunlight was used to treat diseases around the 6th century B.C.

Ancient botanical list recorded that moxa cautery is rather effective when it is ignited using sunlight and we could get better efficacy when we used the sunlight to fight against many diseases.

# MEDI CARBON<sup>+</sup>

## “ Automatic development of inverter full-spectrum light system ”

Inverter-type design provides convenience to users through carbon rod automatic control that developed MOSFET module.

Most of the photovoltaic devices are manual, and after a certain period of time, the user has to adjust the spacing of carbon rods, and the smoke and smell of carbon combustion makes it very inconvenient for patients to use them.

The Full Spectrum Light System developed by our company automatically operates the carbon rod without smoke or smell, and can be used automatically by setting the carbon rod for four hours in a row without any inconvenience during treatment.

It is composed of various programs with LCD Touch Panel, which makes user functions more convenient.

KG-MC002

KG-MC001

## “ Increase your immune system! ”

A 1 degree drop in body temperature reduces immunity by 40 percent, and a 1 degree rise in body temperature increases immunity by five times.

The immune system has natural and acquired immunity.  
what does the immune system work in our body?

- ① Information exchange between the immune cells in charge of the immunity.
- ② Forming a close network with the nervous system and the endocrine system.
- ③ Fighting germs and viruses.
- ④ Preventing allergic and autoimmune diseases.
- ⑤ Immunological monitoring devices that repel cancer cells.
- ⑥ It is essential to maintaining health.

KG-CL003

## Main Functions of Full Spectrm Visible Light- Carbon Light!

Recovery of Function	All function of the body is normalized since hormone secretion is increased, aging is prevented, energy is improved, and automatic nerve is normalized.
Thermal Action	It makes heat penetrate into the deep part of the body and raise the temperature up to 43~45°C killing cancer cells but strengthening normal cells.
Pain Killing·Cough Suppressant	It has pain killing action without relying on drug. Also, it stops cough or asthma controlling automatic nerves.
Production of Cell·Production of HSP	It is same as 「Regeneration Action」, especially it is effective in granulation. Carbon light raises temperature of deep part of the body and produces heat shock proteins (HSP) strengthening the cells and normalize the damaged proteins.
Growth Action	Irradiation of carbon light on rice, bean, chicken, silkworm, etc. makes 15% of growth of them in average, which shows obvious growth action of carbon light.
Sterilizing Action	It is effective in many incurable diseases since it kills harmful viruses directly and also it does phagocytosis of white blood cell.
Regeneration Action	Irradiation on under the wings of rooster that its testicles are removed makes regeneration of testicles, which shows obvious regeneration and proliferation actions. (It makes granulation.)
Detoxification	Calcium within the blood increases remarkably and it strengthens tooth or bones and newly forms them by combining with phosphorus.
Vitamin D Production	It revives “Ergosterin” of subcutaneous fat and makes Vitamin D.
Blood Increase Action	It increases white blood cells, red blood cells and hemoglobin in the blood.
Bonesetting Action	It makes bonesetting action that set the bones of ankle, wrist and others to the right positions.
Metabolism Action	It improves the perviousness of the blood enhancing metabolism. Also, it works to discharge excessive cholesterol by this action.
Nerve Impulse Action	Light therapy stimulates autonomic nerve and recovers dull motive nerves, which recovers partial paralysis or infantile paralysis.
Ulcer and Inflammation Healing Action	<p>Light therapy cures stomach ulcer and duodenal ulcer.</p> <p>①<b>Absorption of Inflammation</b> : When boil is swollen, irradiation reduces pain and swelling conspicuously. (When one has severe pains due to salpingitis, pain is reduced by light therapy. This means that inflammation of internal organs is absorbed.)</p> <p>② <b>Promotion of pain killing, anti-inflammation and suppuration</b> : Light penetrates into the painful boil and reduces its pain almost completely. You can promote suppuration without pain when you irradiate properly on the boil.</p> <p>③<b>Self-Drainage of Pus without Incision</b> : Light therapy makes suppuration without pain and it can reduce exhaustion of physical strength, and it makes granulation around the boil. It also prevents expansion of boil destructing itself, which cures the boil without making scars.</p> <p>④<b>Suppuration Absorption of Internal Organs</b> : Carbon light penetrates into the deep parts of the body and it absorbs the suppuration of internal organs. (There was an example that cured the patient with tuberculosis peritonitis who was diagnosed with incurable disease using light therapy (90 times) completely.)</p>
Reviving Action	There were many examples that dead body in the morgue was revived by irradiation and it extended life expectancy conspicuously.
Stress Reduction Action	It relieves the fatigue of internal organs, blood or cells, nerve system, etc. and liberates us from stress of mind and body.
Physical Constitution Improvement Action	Long-lasting light therapy changes unusual constitution, hypersensitive constitution, scrofulosis, asthenic constitution, and stroke type constitution into healthy constitution.

## Major Healing Effect of Full Spectrum Light

- 1 It has excellent effect in pain treatment.  
(Its pain killing action is very excellent incomparable to other treatments, and it is also effective in the pains of shoulder, waist, neuralgia, rheumatism, lupus, and pain killing of terminal cancer.)
- 2 Burn is cured without scars, and cicatrix is not formed.  
(There is a example in Japan that it was used as the treatment of atomic bomb disease and the burns.)
- 3 It has excellent effect in curing malignant tumors like cancer and absorbing boils.
- 4 It is effective in paralytic illness like partial paralysis, infantile paralysis, etc.
- 5 It is effective in bone diseases like arthritis, fracture, caries, periostitis, etc.
- 6 It is effective in dental, ophthalmologic, ENT diseases.
- 7 It is very effective in solution for obesity. Body weight is reduced and many diseases are cured.
- 8 Skin disease is cured and it is very effective in skin care.  
It is effective in allergic disease.
- 9 It is effective in many adult diseases (stroke, cardiovascular disease).  
It makes the blood to normal state of alkalescence.
- 10 It is effective in poisoning pollution disease.  
(It is effective in heavy metals like mercury and drug addition.)

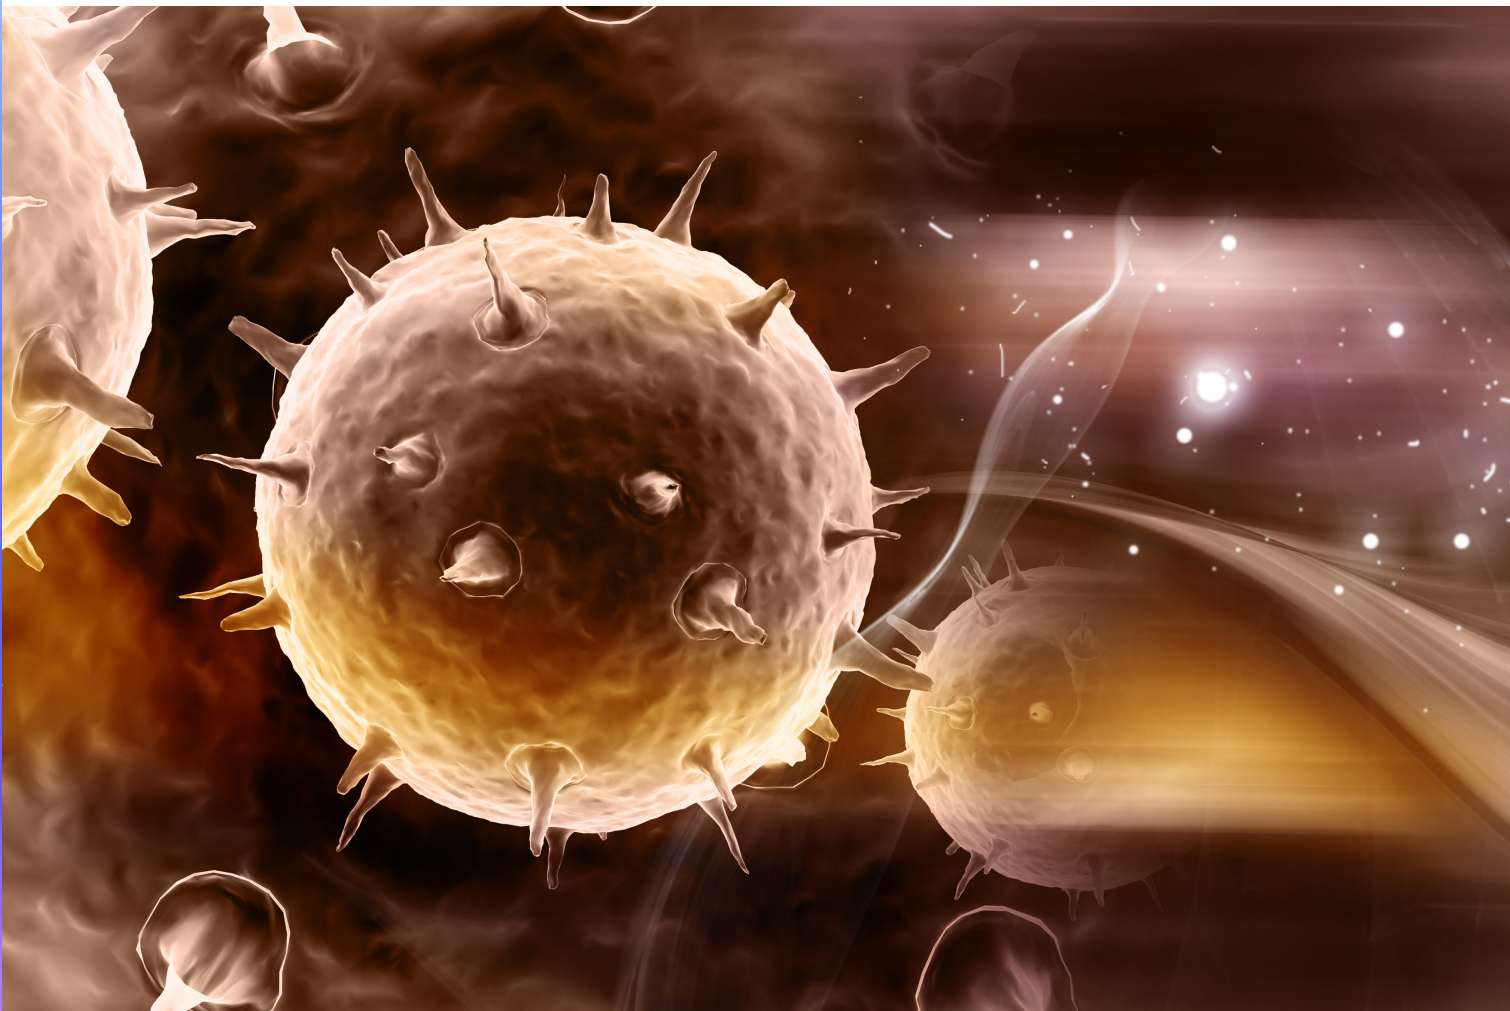

## A Study on the "New Virus"

Full Spectrum Light System can enhance human immunity as well as viruses, killing viruses while treating chronic diseases and reducing infections. It serves as a "defense" against deaths from the new virus.

If you look at the "new virus" now in vogue, it will be disastrous if it develops into a single chain structure (RNA) type development, its infectious and variable unpredictability, and if the mutation exists in a double chain structure.

(because there is currently no medication.) But the undeniable outbreak of transmission between "animal and animal, an animal and a person, a person and a person" shows the existence of an intermediate "host," the presence of an animal or a person with symptoms that appear from infection, results from the virus' mad cloning. If so, isn't free of charge a priority option to prevent it in advance or let an outbreak person be subjected to helpless cloning or direct death with some sort of medical intervention? Promote and maintain the normal metabolism of cells by inhibiting small molecule peptide oil cell degeneration and balancing gas immunity to activate cells by effectively removing the highly harmful healing device in the human body, thereby restoring damaged cells and maintaining cell structure and function.

## Visible Light Fighting Against Even Cancer!

Visible Light Therapy. It is applied to the treatment of many diseases or symptoms. Light can penetrate into our body and raise the temperature of deep part, which enhances level of immunity and kills all the germs or viruses.

If there is no water or oxygen, any living creature cannot survive.

Countries that have lots of sunlight are used not to pay attention to the importance of sunlight.

Also, importance of light has been ignored according to the cultural development and destruction of ozone layer, which causes modern diseases and various symptoms.

## The pain goes away like a lie!

If you believe in rays and treat them hard, the pain will definitely go away.

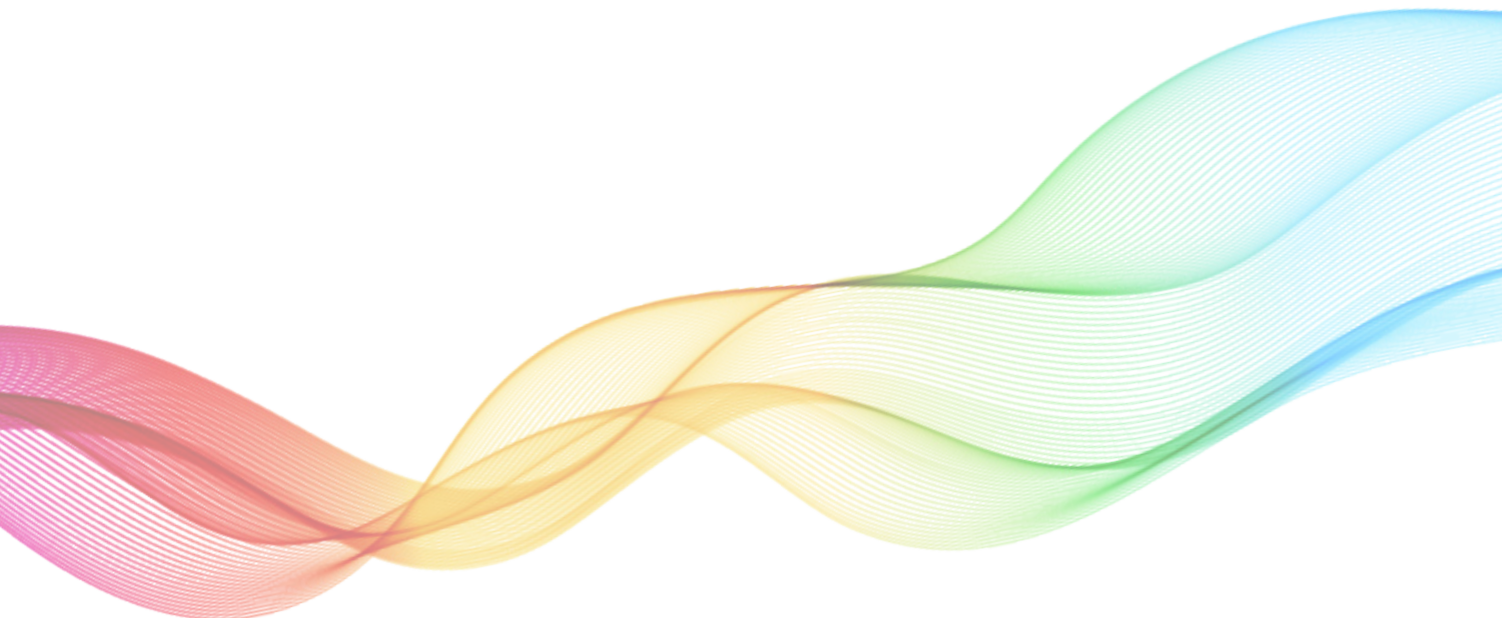

Wherever it hurts, you know that pain, such as burns, pain, pain in the heart, pain in the stomach, and internal pain, such as pain, disappears when treated with light.

So one of the advantages of phototherapy is that any pain has a mitigating effect. But few people believe in the pain of phototherapy without experiencing it.

Even if you hear a story from someone who has actually experienced pain relief, most people will say, "I can't believe it!" Even in my experience, 100 out of 100 people who have been told by someone who has never experienced visible light therapy. The answer is that it was really mysteriously cured.

There is a saying in English, "Seeing is believing,"

If you also try the analgesic effects of visible light therapy, you can be convinced by "seeing is believing".

## “ There is no disease not to be cured by carbon light.”

Light therapy in Japan has been developed early holding light medical conference, and they contributed to the cure of many incurable diseases using sunlight therapy apparatus, carbon light therapy apparatus and carbon rod therapy apparatus that are developed successfully.

Mr. Kuroda who is a chief of Japan Light Therapy Laboratory and authority on carbon light treatment said “There is no disease not to be cured, and adult disease is not equal to other diseases. Even incurable disease like cancer can be cured. Actually, he introduced many clinical examples of miraculous treatment of many diseases in his books like ‘Heredity and Light’ receiving the attention throughout the world.

## Treat cancer with visible light therapy.

When carbon light is irradiated in a living body, carbon and various elements mixed during carbon rods are burned to become light" energy with light" and penetrate deep into the body, i.e. in humans, blood circulation improves and the metabolism becomes active." It also produces or activates" vitamines" in the body, increases" calcium" in the blood, activates" hormone" secretion and promotes cell proliferation.

Carbon ore strengthens cells with cell regeneration and especially with increased heat-activated protein (HSP), and has an unparalleled analgesic effect than any other means. Therefore, phototherapy gives life vitality by eliminating patients' pain and increasing their energy to strengthen their resistance, and enables fundamental one-inch treatment, not alleviation or mitigation of temporary symptoms.

Comprehensive visible light enhances the body's self-defense function, for example, when the body catches a cold, it fights germs and comes back to its original state very naturally, which is how cells in our body fight the virus for self-defense.

In order to enhance self-defense, it is necessary to strengthen the balance of antioxidant enzymes, lymphocytes, and granules, among which lymphocytes play a large role as immune warriors, and immunity is the main force of natural healing. It would be said that killing cancer cells is the surest and safest way to prevent cancer by making effective use of these body-equipped immunity.

In particular, carbon rays reduce the heat caused by the disease, and on the other hand, when the body temperature is low, such as cancer patients due to coldness or hypothermia, they control the body temperature. High fever like a fireball also has the great advantage of being so-called fever, lowering body temperature and having no side effects such as fever reducer, as the rapidly augmented anti-military force by visible light completely overpowers the pathological elements. The human body is irradiated by carbon light, which is a comprehensive visible light, and when the body temperature rises, heat-activated proteins are produced, resulting in biotropic effects, and the strength to destroy cancer and germs increases, thereby maximizing self-defense capabilities.

The surge in cancer patients has nothing to do with the fact that modern people's body temperatures are dropping, which has reportedly dropped by nearly a degree in human body temperature over the past half century. In other words, it is now at 35 degrees from an average 36.8 degrees a half century ago. Dr. Yumi Ishihara, known in Japan as "a doctor who treats former prime minister and doctors," said a drop in body temperature by 1 degree lowers immunity by 40 percent, while a rise in body temperature by 1 degree increases immunity by 5 times. This is the gist of the central theory of "body temperature immunotherapy" which is in the spotlight these days.

If a person's body temperature drops by just one degree, cancer cells become highly active, and symptoms of excretion and allergies appear, which greatly reduces their immune system. In addition, proteins in cells in our bodies are damaged by various diseases, and in hot heat conditions, cell disorders recover and give us the strength to beat the disease. For the treatment of heat, papyrus, which is estimated to have been around 5,000 years ago, also has a record of treating lumps in the breast with high-temperature heat, and Hippocrates said, "treat diseases that cannot be cured by medicine by surgery. Treat diseases that cannot be operated on with heat. You can't cure a disease that can't be cured even with a fever forever," he said.

Recently, heat therapy and Visible light therapy are widely applied to cancer treatment and prevention in the West as well as in Asia such as Korea, Japan, and China, and traditional medicine is also in the spotlight in the West.

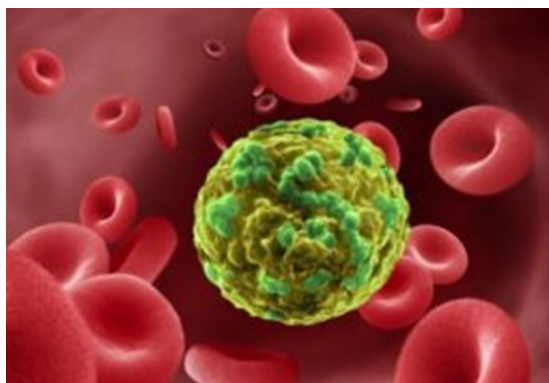

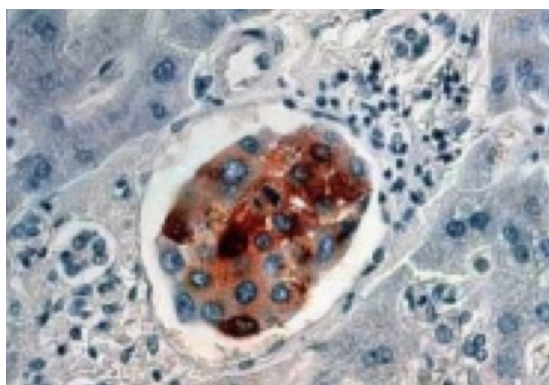

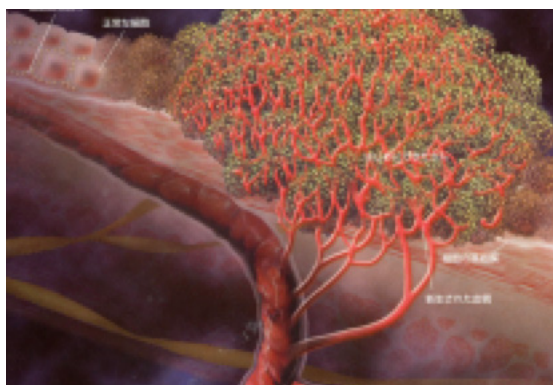

Modern Western medicine is obsessed with the principle of treatment, mechanistic and element-reduction, which uses treatments that leave serious side effects and aftereffects, especially diseases that are treated with medicine or surgery. However, drugs that perform all pharmacological actions have poison effects, especially those made from synthetic compounds, which have serious side effects within the human body.

So even if it seems to heal on one side, it creates a problem on the other. And since there is no unnecessary organ or organ tissue in the body, surgery must leave a big aftereffect.

Here, we feel the weight of the words of Dr. Ann Dei Williams of the United States, "It is medicine in the 20th century that has been captivated by the illusion that doctors, drugs, and surgery can cure diseases."

Medicine or medicine is also a means to supplement the natural healing power of diseases acquired by mankind. If medicine or medicine were not developed in the past, even those who could not survive can survive now.

Diseases occur when natural healing powers are not normally active, and symptoms are also natural healing processes, such as fever, headache, runny nose, and muscle pain, and dermatology shows itching, red spots, phosphorus scales, engraving, and magnetism. There is also a rash as an overreaction.

## "Cancer" cells destroy surrounding tissue.

It can be said that humans have not yet fully identified the "design map of life," but the natural healing powers inherent in our bodies are fully understood and then committed to treatment. Like the words of Hipocrates in Greece, medicine is just a technique to imitate natural healing. Human beings have a "full-time, inner doctor" and the most reliable "body general hospital" in their bodies.

Cancer is generally used in the same sense as malignant tumors, but pathologically, cancer tissues refer only to those that occur in epithelial tissue, and malignant tumors that occur in bones or muscles are called tumors, not cancer. The tumor is not an epithelial tissue but is treated the same as cancer as a malignant tumor. In general, tumors are more dangerous as they grow larger, and even without metastasis, they invade nerves or tissues and cause various physical disorders.

When cancer spreads, no matter where it starts, the results are very bad. Prostate cancer, mammary gland cancer, and thyroid cancer are more likely to spread to bones, and colon cancer is more likely to spread to the liver and lungs. The commonly known pre-lymph node transfer is when cancer cells that flow through lymphatic fluid get caught in the lymph node network and multiply in it, and the fact that the lymph nodes must be removed as a probe of the immune-functioning lymphocyte, which means that cancer cells already have a powerful force to not be pushed by biommunocytes, and in this case, they will be very difficult to cope with.

As shown above, cancer is cured by a comprehensive treatment of visible light. Some argue that cancer is cured by the restore of the abnormal gene due to the rehabilitation of carbon light, and others argue that light works on the virus attached to the cancer. In addition, it is already known in the medical community that high temperatures of 40 degrees to 45 degrees can reduce cancer, and carbon light, a comprehensive visible light, increases the temperature of the heart of the body to high temperatures.

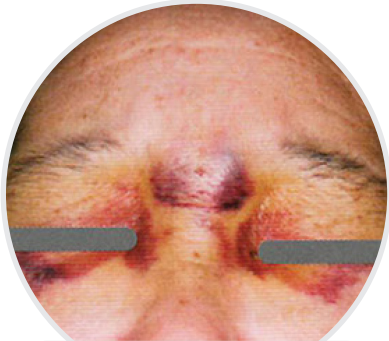

The more acidic the environment of cancer cells is, the more sensitive they become to temperature sensitivities, making cancer cells die easily from high fever. Therefore, if the body temperature rises by only 42 degrees Celsius, cancer cells cannot recover and die. Therefore, cancer cells are repeated.

If the heart temperature is increased in the place where cancer cells are located, the cancer will disappear. The cancer patient is Many scholars argue that most hypothermia causes lower body temperatures than normal people, and therefore higher body temperatures are key to cancer treatment.

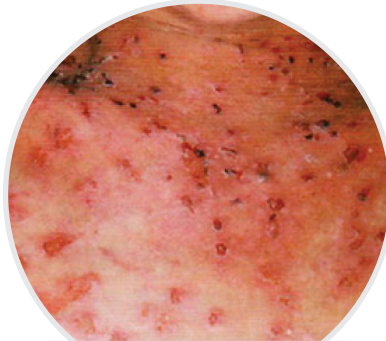

Although there are, of course, intensive heaters (sumertrons) and other physical heat therapy as a way to increase body temperature, this maximizes physical exhaustion, and drug heat therapy can have side effects depending on the symptom constitution. However, comprehensive visible light irradiated by carbon-fluorescent light has no side effects and does not burden the patient.

In particular, the heart effect can raise the body temperature deep inside the body to a high fever, which naturally exerts a powerful cancer-causing effect without pain.

## Visible Light Treatment Case

Areata alopecia

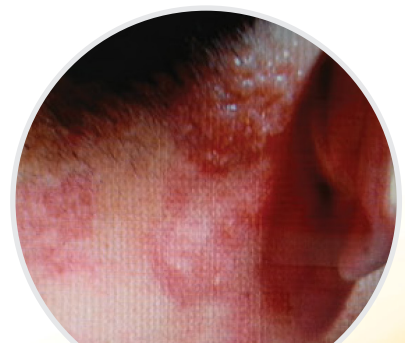

Eczema

Atopic dermatitis

Burn

Shingles

## Visible Light Treatment Case

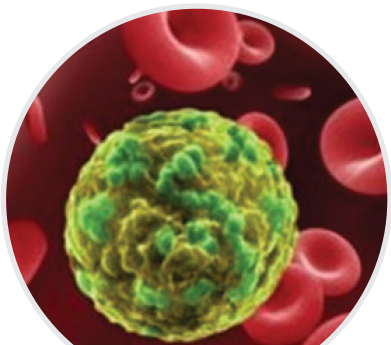

Thyroid disease

Sleep disorder

Cervical inflammation

Cancer

Pressure ulcer

Eczema

Inferior varicose veins

Parkinson's disease

Variant of pain disability

## Magic light! Miraculous light!

The heart effect of carbon light increases the heart temperature in the body, effectively killing cancer cells, but normal cells have the function of protecting them. The reason why cancer is definitely better with phototherapy is that in addition to the photoremediation of abnormal genes and the photovoltaic behavior of viruses attached to the cancer, the heart-to-heart blood flow promotion.

This is because it has the effect of enhancing immunity through production of thermal activated protein (HSP) by heat. This is, in oriental medicine, the regular promotion of soldiers by the fire of life and the strengthening of muscle strength.

It is the visible light therapy that treats a malignant tumor called cancer without surgery. Carbon irradiation is the most ideal form of cancer because it naturally increases the patient's vitality without side effects, is non-toxic and does not harm the human body entirely.

Kuroda, an authority on carbon visible light therapy, said "there is no disease that cannot be cured by light rays.

Something like adult disease is not even on the axis of the disease. They cure all incurable diseases like cancer." Throughout his life, he has made great achievements in visible light therapy by treating numerous incurable diseases with carbon visible light therapy equipment, which has also pioneered new treatments in (cancer tumor) treatment and published amazing clinical treatments such as Cancer's Restoration and in many books.

It presents clinical cases in which light rays were used in various cancer treatments such as stomach cancer, esophageal cancer, and uterine cancer, and he himself devoted his entire life to studying light therapy to save numerous cancer patients. Modern medicine has made remarkable progress in cancer treatment, but cancer has not yet been conquered. Western medicine is obsessed with the wrong treatment that cures disease with medicine and tries to develop a new drug, but there is no special medicine yet to fully treat cancer without side effects.

Cancer has a mechanism to protect itself by releasing drugs such as anti-cancer drugs out of the cell, and cancer cells are more advanced than normal cells and thus strongly exclude anti-cancer drugs, which drives patients to more pain. Shigeo Haruyama, a renowned Japanese doctor, claims that 80 percent of cancer patients are killed with anti-cancer drugs.

According to recent reports, cancer is the number one cause of death for Koreans. The risk of cancer in survival up to average life expectancy is 25.6 percent, with one in every four people at risk of cancer and one in two in men is expected to die of cancer. The number of people in their 50s and 60s has increased rapidly every year, but in recent years, the age has been getting lower, increasing the rate of people working in their 30s and 40s getting cancer.

Therefore, it is necessary to fundamentally prevent cancer growth by activating the natural healing power and immune function of the human body rather than carrying out aggressive treatments to extinguish cancer at once with chemotherapy similar to bombing the whole body.

## Principle of Carbon Rod and Its Use!

Carbon rod with main materials of high purity carbon emits medically effective and necessary wavelength, and its center is combined with many metallic elements by high technology.

Carbon emits the most strong heat and light on earth, and carbon irradiator makes metallic elements that are in the center of carbon rod vaporize and illuminate using its high heat (3,600°C) to irradiate on the body parts

Combined metals in the center of carbon rod are selenium, copper, iron, etc. and unique color light of each metal shows special treatment effect.

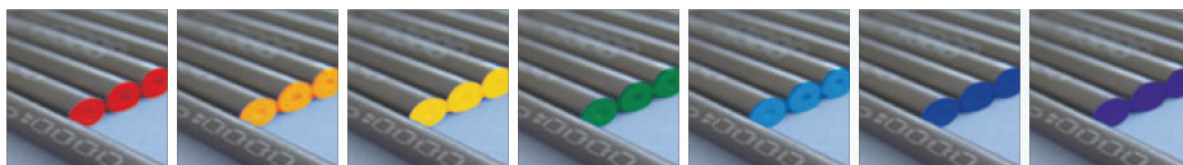

Carbon post used in light therapy apparatus is in black color with the length of 15cm and diameter of 8mm which has hole in the center and this area is filled with elements for light constituents. Carbon has good conductivity and is hard and strong, and it is weak at impact like falling and easily broken.

It is combusted at about 2,700°C ~ 3,000°C fixing in electrode holder. Then red colored and pale element combined with plasma that contains continuous spectrum is combustion light. Basic carbon is classified by color.

Carbon and many elements are combusted and they changed to light energy which penetrates into the body deeply and makes good blood circulation increasing level of immunity and metabolism, which creates vitamins and increases calcium for smooth hormone secretion and cell proliferation.

Carbon light also enhances cells by increasing cell regeneration and heat-activated protein (HSP).

Light rays can penetrate into our bodies and raise the temperature of our heart, and when the body temperature rises, our immunity increases and all bacteria, viruses. Cancer cells all die from high fever.

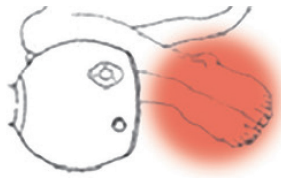

Color	Name of a disease
Blue	Skin diseases, heart disease, respiratory disease. Parkinson's Disease, Gynecological diseases, tuberculosis.
Red	Tumor Disease (Ophthalmology, Paralytic Illness) pain. Urology, Muscular rheumatism, pleurisy, enlarged prostate. Analgesic action. Absorption scars. Cancer, radiation, burns. Pain Killing, Eye.
White	urology, Prostate hyperplasia. Skin diseases. frostbite. pleurisy, Neuralgia. Neurological diseases. Parkinson's disease. Refractory disease.
Purple	White Spot (Leucoma), Sarcoma. Skin Disease. Neuralgia, Prurigo, Neurodermatitis
Green	Skin disease, bone disease, heart disease. Respiratory disease, Asthma, Caries. Analgesic action. Cataract.
Yellow	Pain (deep area), inflammation. infection. arthritis. edema.
Black	General Health Maintenance. Immunity. anemia. Keratitis. conjunctivitis. diabetes. Ulcerative bowel disease.
Black	Cancer (Tumor), Tumentia. malignant tumor.

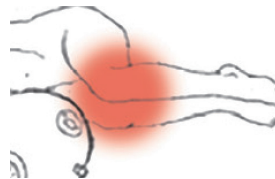

## Description of Pictures of Parts to be Irradiated.

### 1. Both Ankles

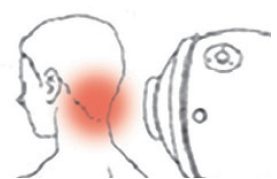

Expose from front ankle and to tiptoe stacking both legs.

### 2. Both Knees

Expose both knees lying on one's side.

### 3. Back of the Head

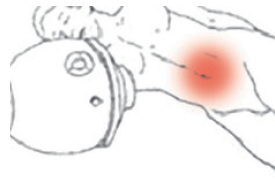

Lying on one's side or sit on a chair.

### 4. Throat

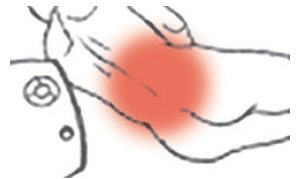

Start from both sides lying on one's back. Lean the back of the head against the pillar when you sit down.

### 5. Stomach

According to the illness or in case of child.

### 6. Waist

Lying on one's side or sitting.

### 7. Both Soles

Lying on one's side or stretching both legs.

### 8. Mouth

Lying on one's side or sitting on a chair.

### 9. 10. Right/Left Shoulder

Lying on one's back or sitting on a chair. Painful area or back side.

### 11. Upper Belly

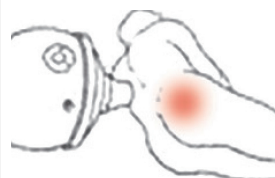

Lying on one's side. Painful Area.

### 12. Shoulder Blade

Lying on one's side or sitting posture.

### 13. 14. Right/Left Hip

Picture shows position of No.13 lying on one's side.

### 15. Forehead

Lying on one's side. Lean against the pillar at sitting posture.

### 16. Eyes & Nose

In case of one eye or nose or child, eyes should be closed.

### 17. 18. Right/Left Ear

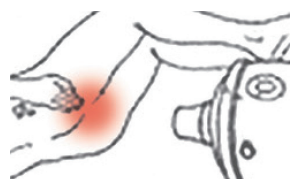

Lying on one's back or sitting.

### 19. 20. Right/Left Temporal Region

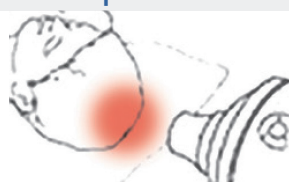

Lying on one's side or sitting posture. In case of long hair, irradiate the center spreading the hair.

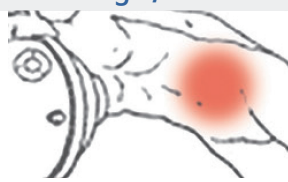

### 21. Anus

Lying on one's side raising the hip and irradiate anus.

**22. Top of the Head**

Lying on one's back. In case of long hair, irradiate the center spreading the hair.

**23. 24. Right/Left Groins**

Lying on one's side. No.2 Concentration - Child according to the symptom.

**25. Genitals****26. Perineal Region****27,28. Liver, Right Ribs**

Lying on one's side or sitting.

**29. Dorsoventral Muscle, Calf**

Lying on one's side without using concentration.

**30. Rear Thigh**

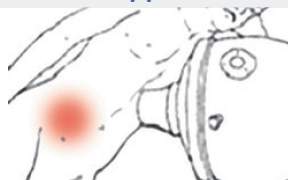

Lying on one's side.

**31. Regio sternalis**

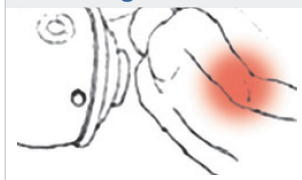

Lying on one's side or sitting.

**32. Cervical spine**

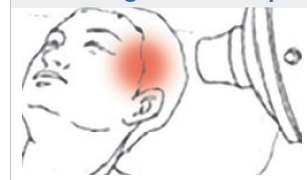

Lying on one's side or sitting.

**33. Appendix**

Lying on one's back on one's side with right side up or left side up depending on the pain.

**34,35. Right/Left Elbow**

Lying on one's side or sitting.

**36,37. Right/Left Temple**

Lying on one's back or sitting with the eyes closed.

**38,39. Parotid region**

Lying on one's back or sitting.

**40. Right Mastoid**

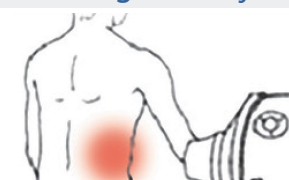

Lying on one's back or sitting.

**41. Left Mastoid**

Lying on one's back or sitting.

**42. Left Kidney**

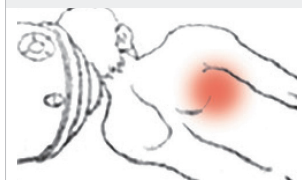

Lying on one's back or lying on one's face.

**43. Right Kidney**

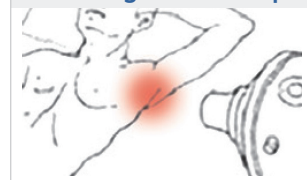

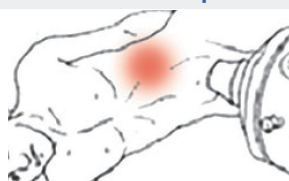

Lying on one's back or lying on one's face.

**44. Pectoral region**

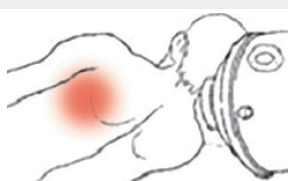

Lying on one's side or sitting.

**45. Right Lower Shoulder Blade**

Lying on one's side or sitting.

**46,47. Right/Left Armpit****48. Left Ribs (Spleen)**

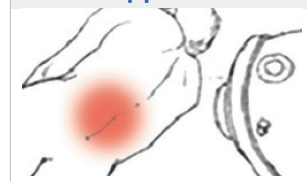

Lying on one's side or sitting.

**49. Left Lower Shoulder Blade**

Lying on one's side or sitting. (Rear of the heart)

**50. Left Lower Breast**

Lying on one's side or sitting.

**51. Upper Waist**

Middle between 26 and 6

## Example of clinical data using carbon light

Subject of a thesis	Announcement	Symptom	Treatment result	Source of dissertation
<b>Effect of Visible Light Therapy in Patients with Somatic Pain</b>	Yun-Hee Kim, M.D., Myoung-Hwan Ko, M.D., Sun-Ho Yang, M.D. and Nam-Gyun Kim, Ph.D.	Random phototherapy in 42 patients with pain. A study divided into 20 people and 22 controls (muscular syndrome, neuropathy, osteoarthritis)	Only visible light therapy units show significant decrease in treatment on the second week of treatment compared to the previous treatment, indicating that it is effective in pain.	Journal of the Korean Rehabilitation Medical Association
<b>Effect of Visible Light Therapy in Stroke Patients</b>	Myoung-Hwan Ko, M.D., Sun-Ho Yang, M.D., Nam-Gyun Kim, Ph.D.1 and Yun-Hee Kim, M.D.	The study classified 30 stroke patients into 19 phototherapy units and 11 control groups, with the same degree of function through FIM values.	After two weeks of phototherapy, 1) A statistically significant improvement in water grip strength in the phototherapy group, 2) The military, which received light therapy in the Semmes-Weinstein monofilament test through sensory evaluation, has made a significant improvement.	Journal of the Korean Rehabilitation Medical Association
<b>The Natural Healing Force of Visible Light and The Healing of Mental Body Diseases</b>	Korean Society of Jungshin Science	acute gastrointestinal infarction of heart weakness	In case of acute gastrointestinal convulsions, local intensive investigation will eliminate the whole body in a short time, and those with weak pain and heart will not be out of breath after 15 to 20 minutes of investigation on both soles of feet.  After 20 minutes of irradiation, the pain is relieved.	Proceedings of Korean Jungshin Science Symposium.
<b>Effects of Full Spectrum Visible Ray Therapy by Carbon Electrodes on the Cutaneous Wound Healing of Rat</b>	Department of Oriental Rehabilitation Medicine, College of Oriental Medicine, Kyung Hee University	Changsang Healing is performed through the process of initial inflammatory response, formation of childcare tissue, and synthesis of substrate after the creation of the Changsang.	In order to investigate the effect of visible light on wound healing using a carbon rod used in clinical practice, a full-thickness defect on the back of a rat was made.  After irradiation with visible light, the morphological changes of the wound and important results were obtained for wound healing.	journal of the korea skin research society

### Example of clinical data using carbon light

Subject of a thesis	Announcement	Symptom	Treatment result	Source of dissertation
<b>Psoriasis dermatitis caused during the use of a tumor ulcer inhibitor treated with visible light therapy.</b>	Soonchunhyang University Seoul Hospital Internal Medicine School	phospholipid dermatitis accompanied by plate rash and eczema in the frontal and whole bodies.	Three weeks later, skin tear lesions and itching are significantly improved by applying light treatment three times a week.	ournal of Rheumatic Diseases
<b>A Case of Bright Light Therapy in a Treatment Resistant Patient with Major Depressive Disorder</b>	Department of Psychiatry, Kangwon National University Hospital, Chuncheon, Korea 2 Department of Psychiatry, Yesarang Hospital, Cheongju, Korea3 Department of Psychiatry, Kangwon National University School of Medicine, Chuncheon, Korea	weight loss, depression, sleep problems, motivation loss, suicide, etc. accompanied by loss of appetite	Treatment time is 80 minutes, and after 14 treatments, depression, anxiety, loss of motivation, loss of appetite, etc. is improved.	J Korean Neuropsychiatr Assoc 2015;54(4): 600-604 Print ISSN 1015-4817 Online ISSN 2289-096
<b>a pressure ulcer from a cerebral infarction patient.</b>	Jecheon Oriental Medicine Hospital, affiliated with Semyung University	After diagnosis of cerebral infarction, he was hospitalized, after which a sacral ulcer occurred during hospitalization.	About two months after the start of the irradiation, the pressure ulcer was further reduced and the pain was no longer reported. After three months of investigation, the pressure ulcer was completely cured.	Semyung University Hospital of Oriental Medicine
<b>the use of Visible light therapy in sleep disorders.</b>	Psychiatric Clinic	Various symptoms such as insomnia, sleepiness, fatigue, depression, etc.	One to two hours of daily treatment is applied to various sleep disorders to identify safe treatments with low cost, easy to implement, and few serious side effects.	Nanum Psychiatric Clinic,  12-16,2008
<b>Visible light therapy for chronic fatigue syndrome</b>	Department of Neuropsychiatry, Korea University College of Medicine	Severe fatigue, sleep and concentration disorder	After 2 hours of phototherapy from 7 a.m. to 9 a.m. for a total of 23 days, anxiety, feeling down, physical discomfort, fatigue, etc. improved	Korean Neuropsychiatric Association

# CARBON LIGHT

---

## A miraculous light of mystery

nce the riddle of living things exists infinitely, it takes a lot of time and effort to establish everything. Phototherapy is a natural benefit essential to living things, which freely controls light energy and shows the potential for use in treatment. The evidence is that various treatments of light energy of only a few percent of light energy can be realized.

I think there is still an unknown area of light energy,  
but I am sure it will be a treatment.

Sunlight that saves living creatures is the best medicine which the Creator prepared for humanity and the key to enter the door solving modern incurable diseases. We are sure that light therapy is the best natural healing method curing the diseases without jarring human body using natural light, and we hope that all persons use this product freely to enjoy healthy life. We express our respect to the doctors who cured incurable diseases including cancer.

We really wish that it gives the light of hope to the patients and their families who are fighting against cancer, and that it helps the persons of the clinics, hospitals and oriental medical clinics who are striving to overcome incurable diseases.
